

Vadim Taratuta

Full Stack Engineer / React · NestJS · TypeScript

Full-stack engineer with 1.5 years of commercial experience building product web apps: typed React front ends, NestJS APIs over Prisma, and shared design systems. Worked across US home services, healthcare and e-commerce.

EXPERIENCE / 2024 — 2025 · 3 ROLES

Full Stack Engineer · Yellow Systems

Dec 2024 — Nov 2025
Remote

CHHJ (College H.U.N.K.S.) — a US home-services franchise with 10M+ customers served and 1M+ reviews. Five internal web apps on one Nx monorepo.

- Shipped features across five internal products — **Online Customer Service**, **Tasks**, **Crew**, **Agent Booking Tool** and **Move Estimating Tool** — and owned full-stack work on Tasks: React UI, NestJS controllers and services.
- Helped shape the monorepo's CI/CD: wrote and reviewed GitHub Actions pipeline files while shipping large changes — individual PRs of 10–15k added or rewritten lines.
- Contributed components to **Oasis**, the shared MUI v4 design system with Storybook, keeping five product surfaces visually consistent.
- Worked across two stack generations: legacy Redux Toolkit + Yup + TypeORM/MySQL, and the newer Effector + Zod + Prisma/MongoDB behind a NestJS 11 / Fastify API.

React **NestJS** TypeScript Effector Redux Toolkit MUI Prisma TypeORM MySQL MongoDB Redis Docker AWS

Full Stack Developer · Krainet

Aug 2024 — Nov 2024
Remote

Three client products in four months: a medical portal, a national railway site and an e-commerce storefront.

- **LeoDoc** — fixed critical bugs in a patient health-records portal (Django + React) ahead of the company selling the project.
- **rw.by** — rebuilt the front end of the Belarusian Railway's public site; reviewed and refactored legacy vanilla JS.
- **Sontsa** — continued front-end development of a household-chemicals shop: new features and code review.

Django **React** Python Vanilla JS HTML/CSS

Full Stack Engineer · Itransition Group (internship)

Jul 2024 — Sep 2024
Remote

Three full-stack apps built end to end during a three-month internship.

- Built **Collections**, **Real-Time Paint Online** and **Fake User Data Generator** — both client and server.
- React + Redux Toolkit / RTK Query on the front end; Express and NestJS + Prisma + PostgreSQL on the back end.
- Real-time collaboration over Socket.io, typed REST contracts, and unit tests with Jest and Vitest.

React **Express** NestJS PostgreSQL Prisma Socket.io Jest Vitest

TOOLKIT / DAILY DRIVERS IN BOLD

FRONTEND

React, **TypeScript**, Vite, TanStack Query, Effector, Redux Toolkit, RTK Query, Zustand, React Hook Form, MUI, Ant Design, Tailwind, SASS, Storybook, Socket.io

BACKEND

NestJS, **Express**, Fastify, Prisma, TypeORM, REST, JWT Auth, Zod, TS-Rest, OpenAPI, Django, DRF, Flask, FastAPI, SQLAlchemy

DATA & INFRA

PostgreSQL, **Docker**, MySQL, MongoDB, Redis, SQLite, AWS, GitHub Actions, Nx

QUALITY & TOOLS

Git, Jest, Vitest, Playwright, React Testing Library, Pytest, Jira, Figma, Postman, Linux

SELECTED WORK / COMPANY PRODUCTS → SIDE PROJECTS

CHHJ Platform YELLOW

Operations and booking suite: customer service, tasks, crew app, booking and estimating tools on one Nx monorepo.

React · NestJS · Prisma · MongoDB · Docker · AWS

rw.by Redesign KRAINET

Public site of the Belarusian Railway — new front end on a legacy Python back end; review of the existing code.

Vanilla JS · HTML/CSS · Python

rw.by

Collections ITRANSITION

Personal collections manager with OAuth2 sign-in and Jira issue sync.

React · Express · PostgreSQL · Prisma

Fake User Data Generator ITRANSITION

Realistic test datasets on demand — React client, typed Express API with Faker.

React · Express · TypeScript · Faker

LeoDoc KRAINET

Patient portal for health records and lab results — stabilised critical flows before the project changed hands.

Django · React

leodoc24.ai

Sontsa Store KRAINET

Household-chemicals e-commerce: new storefront features on an existing codebase, plus code review.

Frontend · E-commerce

shop.sontsa.by

Real-Time Paint Online ITRANSITION

Multiplayer drawing canvas — rooms, strokes and presence over WebSockets.

React · Socket.io · Prisma · PostgreSQL

Crypto Dashboard PET

Live coin market dashboard with context state and a custom chart view.

React · Ant Design · Express

github.com/modemobpsycho/react-crypto-website

MORE FROM GITHUB — A FEW OF MANY BUILDS

Weather App

React · RTK Query · Tailwind

weather-web-app

CASE STUDY / CHHJ PLATFORM · 2024 — 2025

A US home-services franchise running its field operations on a suite of web apps built from one Nx monorepo. I worked across five of them and in the shared design system.

Online Customer Service	FULL-STACK
Tasks	FULL-STACK
Crew	FULL-STACK
Agent Booking Tool	FRONTEND
Move Estimating Tool	FRONTEND
Oasis design system	SHARED UI

ENGINEERING DECISIONS

- Contract-driven development: TS-Rest + Zod and OpenAPI/Swagger as the single source of truth between client and API.
- Nx monorepo with shared libraries for types, UI and API clients — one version of every contract.
- Two generations of stack coexisting: Redux Toolkit + TypeORM/MySQL, and Effector + Zod + Prisma over MongoDB/Redis.
- Four environments — Development, Testing, Training, Production — provisioned as code.

EDUCATION & LANGUAGES /

2021 — 2025

BSUIR

Belarusian State University of Informatics and Radioelectronics

Engineer-Programmer / Game Design
